

FACT SHEET

Missouri Department of Natural Resources

Former Amoco Refinery

Sugar Creek, Missouri

July 2002

The U. S. Environmental Protection Agency (EPA) Region 7 and the Missouri Department of Natural Resources (DNR) are providing this update to the Sugar Creek community about activities relating to former BP Products North America, Inc. refinery (former Amoco refinery) in Sugar Creek as well as a new way for the community to get involved.

Status of Investigation Areas

EPA, DNR, and BP Products North America, Inc. have developed a phased-approach to investigate the site. The site has been separated into investigation areas which coincide with the redevelopment priorities established in the Amoco Reuse Plan. This phased-approach is being used to expedite investigations in the areas scheduled for reuse. All investigation and cleanup actions are addressed under the Resource Conservation and Recovery Act (RCRA). Below is a status of each area currently being investigated:

Norledge Area: The corrective measures study has been revised and is under review by EPA and DNR. Next steps will include a public comment period on the proposed corrective measure and implementation of the selected remedy.

Crawford, West Bluffs, and Sugar Creek

Areas: A draft investigation report for each area has been submitted to EPA and DNR for review. The investigation reports will be revised based upon EPA's and DNR's comments.

Norgaard Area: EPA and DNR have reviewed the work plan and developed comments. The work plan describes the proposed sampling and analyses to be conducted during the investigation of this area. Next steps will be completion of field work and development of the investigation report.

Documents Currently Under Review

- ☐ Vol. 4 Sugar Creek Area RCRA Facility Investigation Report
February 22, 2002
- ☐ Vol. 3 Crawford Area RCRA Facility Investigation Report
December 19, 2001
- ☐ West Bluffs Area Volume 5 RCRA Facility Investigation Report
May 13, 2002
- ☐ West Hills Tank Area Investigation Work Plan
June 5, 2002
- ☐ Corrective Measures Study Norledge Area Addendum Phase 2 Redesign
May 31, 2002

West Hills Tank Area: EPA and DNR are reviewing the investigation work plan. The work plan describes the proposed sampling and analyses to be conducted during this investigation. The field work for this investigation is scheduled for this fall.

For a copy of a document, please order via the EPA Web site. The Web site address is

New Public Involvement Opportunity: Discussion Group Meetings

EPA will be available to discuss topics relating to the former refinery, starting this fall. Meetings will include topics that are of concern to the Sugar Creek community, such as current work plans, reports, and upcoming activities. Meetings will be held periodically and in conjunction with the Amoco Focus group meetings. All meetings will be open to the public. The public and other agencies that are involved in the cleanup progress are welcome to participate in meetings. Stay tuned for more information about dates, location, and times!

EPA Amoco Web Site: New look and New Information

EPA has redeveloped its Web site about the former refinery. New sections include a document order form, an announcements board, and a list of all focus group articles that have been published in the City of Sugar Creek's newsletter. Visit the newly designed Web site at <http://epa.gov/region07/citizens/amoco>

Status of the NPDES Permit

BP Products North America, Inc. has applied for a National Pollution Discharge Elimination System (NPDES) stormwater discharge permit with the DNR. A public meeting was held May 23, 2002, which provided the opportunity for questions and discussions. All water quality comments will be considered in final determinations regarding the application.

Access the proposed permit at the following address of DNR's website: <http://www.dnr.state.mo.us/wpscd/wpcp/permits/wpcpermits-pn-060702.htm>

Information Repository: Upcoming Additions

The following documents will be added to the information repository this month:

- West Bluffs Area Resource Conservation and Recovery Act Facility Investigation Report
- West Hills Tank Area Investigation Work Plan
- Corrective Measures Study Norledge Area Addendum Phase 2 Redesign

The information repository is located at the **Sugar Creek Branch Library**, 102 S. Sterling Avenue.

The information repository is a **collection of documents** from EPA, DNR, Amoco, and ATSDR **about cleanup-related activities at the former refinery.**

The Sugar Creek Branch Library's hours of operation are: **11 a.m. to 7 p.m. Monday through Thursday; 11 a.m to 6 p.m. Friday; and 1 p.m. to 5 p.m. Saturday and Sunday.**
